Coming Up

**Integrating with ASP.NET Core Identity**

# Integrating with ASP.NET Core Identity

**ASP.NET Core Identity is a good alternative  
for custom design pages / IAM functionality  
(if flexibility isn't key)**

# ASP.NET Core Identity

**An application programming interface that supports user interface (UI) login functionality, which can be used to manage users, passwords, profile data, roles, claims, tokens, email confirmation and more.**

# Demo

## Adding ASP.NET Core Identity

## Summary

**ASP.NET Core identity is a worthy alternative to building a user management UI from scratch**

- Easily integrates with IdentityServer
